Commissioner for Patents

The present application is not considered to be in sequence compliance. The computer readable disk (CRF) contains problems relating to the formatting of the identifier numbers. In particular, the numbers, which identify the length, chemical identity (i.e. DAN or RNA), for example, should be listed vertically on the page, each receiving its own line. However, the numbers are listed horizontally, with several numbers per line. This problem is apparently inherent in the PatentIn system, particularly when just the "save" icon is clicked. This can be remedied by first saving the file to the hard drive and then saving on disk from there. For further explanation, please call Mark Spencer at 571-272-2510.
